

**Any place
grass
won't grow
or you
don't want
to mow.**

Synthetic grass, sport and putting greens

the unreal alternative to thirsty lawn

How would you like a perfectly manicured, soft and plush lawn that never needs watering, never needs mowing and stays green all year round? The Enduroturf synthetic lawn system gives you exactly this.

Enduroturf is made in Australia for harsh Australian conditions. It has an incredibly realistic feel, yet is also durable enough to be used for commercial purposes and is up to the job of handling heavy traffic, including kids and pets.

It won't let you down and will look great 365 days a year.

- ✓ Low maintenance
- ✓ Always lush and green
- ✓ Pet and child friendly
- ✓ Great for grass allergy sufferers
- ✓ Residential and Commercial ranges available

Enduroturf Supreme

- Australia's first Synthetic lawn to meet 'Made in Australia' standards

**the possibilities
are endless.**

no...

- X watering**
- X mowing**
- X fertilisers**
- X pesticides**
- X bindies**
- X muddy footprints**
- X irrigation costs**

- | | |
|-----------------------|----------------------------------|
| Around pools | Median strips/roundabouts |
| Between pavers | Resorts |
| Courtyards | Verandas |
| Rooftops | Feature areas |
| Play areas | High traffic areas |
| Shaded areas | Difficult access areas |

1
Your existing surface is prepared.

2
A heavy duty foundation layer is shaped for stability and drainage.

3
The Enduroturf Synthetic Lawn is installed. All edges are joined using professional techniques to ensure a smooth, continuous expanse of lawn.

Why is Enduroturf so different?

Enduroturf involves a 5 stage installation process which, combined with Enduroturf's superior products are designed to give you a longer lasting solution!

Precise measurements of specially graded and kiln dried sand is spread evenly across the base layer of the lawn. This layer provides the weight and support needed to keep the strands of grass erect and stable.

A cushioning layer of high quality recycled rubber granules are brushed into the lawn leaving just the right amount of lush green lawn exposed. The rubber acts as a cushioning agent providing an incredibly soft feel underfoot.
